

**LISTING OF CLAIMS**

This listing of the claims provided below is intended to replace all prior versions of the claims. Please amend the claims as follows:

1. (Currently Amended) A computerized method of creating a program management chart comprising the steps of:

displaying a plurality of tasks within a selected set of data as a first part of the program management chart;

displaying a task that is one or more tasks outside of the selected set of data but that is associated with at least one of the plurality of tasks within the selected set of data as a second part of the program management chart; [[and]]

differentiating within the program management chart between the plurality of tasks within the selected set of data and the task that is one or more tasks outside of the selected set of data; and

limiting the displaying of the one or more tasks outside of the selected set of data only to those one or more tasks associated with at least one of the plurality of tasks within the selected set of data.

wherein a shape of the task that is outside of the selected set of data is used to differentiate the task that is outside of the selected set of data from the plurality of tasks within the selected set of data.

2. (Canceled)

3. (Currently Amended) The method of claim 1 wherein the one or more tasks task that is outside of the selected set of data is outside of a project that contains the selected set of data.

4.-11. (Canceled)

12. (Currently Amended) A computerized method of creating a program management chart comprising the steps of:
- accessing a subset of data within a project;
- displaying in the program management chart a plurality of tasks that are part of the project and associated with the subset of data;
- displaying a task that is one or more tasks that are part of the project and [[is]] outside of the subset of data in the program management chart at the same time as the plurality of tasks that are part of the project and associated with the subset of data; [[and]]
- differentiating between the plurality of tasks that are part of the project and associated with the subset of data and the task that one or more tasks that are part of the project and [[is]] outside of the subset of data; and
- limiting the displaying of the one or more tasks outside of the subset of data only to those one or more tasks associated with at least one of the plurality of tasks associated with the subset of data.
- wherein a shape of the task that part of the project and is outside of the subset of data is used to differentiate the task that part of the project and is outside of the subset of data from the plurality of tasks that are part of the project and associated with the subset of data.
13. (Canceled)
14. (Canceled)
15. (Currently Amended) The method of claim 12 further comprising the step of accessing a header relating to the one or more tasks task that is outside of the subset of data.

16. (Currently Amended) The method of claim 1 further comprising accessing header data associated with at least one of the plurality of tasks within the selected set of data in order to display the one or more tasks task that is outside of the selected set of data.

17. (Currently Amended) The method of claim 12 further comprising accessing header data associated with at least one of the plurality of tasks within the subset of data in order to display the one or more tasks task that is outside of the subset of data.
